When clicked on delete should delete..

When clicked on generate.. There is a question bank in my repo with a ilder and jsons lke this:

This is the structure of json : {

```
"questions": [
  {
    "question": "What is an algorithm?",
    "answer": "A step-by-step procedure used to solve a problem."
  },
]
```

```
{
  "question": "Algorithms should always terminate after a finite number of steps.",
  "options": [
    "True",
    "False"
  ],
  "answer": "True"
}
```

These are the question types i am allowing:

```
export const QUESTION_TYPES = {
  MCQ: "MCQ",
  SHORT_ANSWER: "Short Answer",
  LONG_ANSWER: "Long Answer",
  TRUE_FALSE: "True / False",
  FILL_IN_THE_BLANK: "Fill in the Blank"
};
```

It should first Load Question Bank

Remove Used Questions for that specific chapter in that unit in that course for that grade.. I.e with the same planner id if those questions are used for this chapter they should be removed from temporary data

Classify Questions based on difficulty and blooms level and grade level and marks .. We only want questions of that grade level only

Assessment Planning plan the ratio of questions on difficulty blooms level etc and to get a round figure of marks divisible by 10

Question Selection select question based on planned assessment

Generate Missing Questions

Validation the generated questions if not good then regenerate the certain question

Store Assessment in the db

Store Questions in the json file add it in the end ...

And then call the api that gets all the questions so it can display it with updated questions

When clicked on each assessment”
